

HIV Cascade of Care, 1996–2011

The BC-CfE HIV cascade of care illustrates a focused approach for implementing Treatment as Prevention, showing the steps in care, treatment and support for those living with HIV/AIDS. The evolution of the cascade of HIV care in B.C. demonstrates the effectiveness of Treatment as Prevention. British Columbians who access antiretroviral therapy for HIV are living longer, healthier lives. Studies show that meaningful progress has been made in controlling the HIV epidemic through widespread access to testing and treatment.
